

Python labs

Write a python program that displays a custom banner using the # symbol and escape characters for formatting. The banner should include the message.

```
4  name = "Justo"
5
6  code = "#" * 40
7
8
9  print(name)
10
11 print(code + "\v#" + "\v#" + "\tWelcome to street fighter:" + name + "\t#" + "\v#" + "\v#"
12
13
14
15
```

```
+ "\v#" + "\tWelcome to street fighter:" + name + "\t#" + "\v#" + "\v#" + code)
```

```
PROBLEMS  OUTPUT  DEBUG CONSOLE  TERMINAL  PORTS  powershell - python-project + v [] [] ... ^ x
PS C:\Users\23767\Desktop\AWS-COURSES\git-github\python-project> python .\banner.py
Justo
#####
#
#      Welcome to street fighter:Justo #
#
#####
PS C:\Users\23767\Desktop\AWS-COURSES\git-github\python-project> []
```
